

"MAAX" POWER UNIT

Features

A multi purpose all in one tank, pump, and valve assembly that can meet all your residential needs.

- MAAK Power Units "give you the Maax in quality and performance with innovative features you cannot get with other power units!"
- Aluminum light weight tanks
- Quiet self-supporting design keeps noise level super low compared to other power units. Rattle free carry handles and rubber feet make it easy to move and even more quite.
- Easy service and replacement of any component without removing the oil!
- Industry's only self-adjusting valve for constant ride quality no matter the temperature of the oil.
- Change speed and flow rate without changing pump size, use one pump for 70/80/90mm jacks.
- Onboard self-diagnostic LCD board with touch buttons allow you to easily make changes and adjustments without turning multiple Allen adjustments. Resets to original setting without counting turns!
- Bidirectional out port for easy pipe and wire entry.
- Clean compact design uses only 25 gallons of oil.
- Locking lid keeps everything clean. Lid can be flipped around and locked from front or back allowing you more install options.
- External dip stick allows easy oil level verification.
- Manual emergency lowering, uses an easy to find red serrated knob with spring loaded return to ensure a quick stop in an emergency.
- Low mount option for low overhead space requirements.
- Quick disconnect pressure port makes inspections and checking pressures fast and simple.

Low Mount Option

Free Standing Option

*Shown with optional RMEP controller and disconnect package. Controller and disconnects are not included with standard stand alone power unit.
