

Proactive Diagnostic Oil Testing Kit

Prolong oil life

The only test kit with
95% field accuracy.

- Easy to use viscosity meter.
- Blank record sheet for copying and reuse.
- Instruction guide with viscosity minimum and maximum chart.

OTK-VG38

Benefits:

Increased oil life increases parts reliability.
Reduces service calls on contract customers.
Increase your service profits when you do scheduled maintenance. Testing oils allows you to offer reconditioning, additives or replacement options.

ONSITE OIL TEST KIT

FAST - ACCURATE - ON SITE

Tests Oil Break Down

- 95% or greater accuracy on viscosity breakdown.
- Easy to use, takes less than 5 minutes to read viscosity.
- Accurately tests wide range of oil viscosity in the field.
- Sample vials to show customer, or send for further analysis.

Viscosity gauge accurate to 95% or greater on site means immediate results.

Quality glass magnifying lens w/ white LEDs for inspecting sample filters.

Infra-red thermometer to verify oil temperature for viscosity testing.

Heavy duty magnetic pick-up tool for removing metal wear filings that settle in the tank from the pump and motor that can decrease pump and valve life.

RMEP designed filter holder. Holds many types of filters and is weighted to help retrieve a proper sample from the tank.

Oil Contamination

- RMEP designed filter can hold various grade filter pads to make detecting contamination easier. Pads can be sent to a lab for further analysis.
- Magnetic pickup tool collects the shavings and fine steel particles off the bottom of the tank where they settle, indicating how much wear has occurred.
- Magnifying glass to examine filter pad to help determine if conditioning or filtration would be beneficial to extend oil life and protect seals and valves.

Service Records

Comes with blank test result sheet for copying, just fill out and leave with the customer or keep for your records. Color photo of oil samples to compare samples to.

All included in an easy to carry hardcase.
